RE: Southside Pump Station Retaining Wall

Recently, a bid advertisement for the Southside Pump Station Retaining Wall was publicly announced for the construction of a retaining wall with steel reinforcement at the City South Side Pump Station. The purpose of the retaining wall is to eliminate adjacent soil from protruding near the pump station.

The city received one bid from Schultz Construction, LLC and it is my recommendation to accept the bid in the amount of \$19,500.00 from Schultz Construction, LLC. Upon approval by city council, my office will proceed forward with the necessary paperwork.
